Who Can Donate

We do realize that the decision to participate in Oocyte donation is not easy to make. Requirements are women who are the age of 20-33, healthy, non-smokers, know their medical history and are able to complete the initial application packet. Once they have returned the initial application packet, women who are accepted into the program will proceed with the blood work, an ultrasound, psychological testing, and a complete physical examination. Once these tests are successfully completed the donor proceeds to the matching phase. Most donors are matched with their anonymous recipient couple within two months. The stimulation of the donor's eggs and the actual donation process usually proceeds within the next two months.
